

# Instruction of UR03

## Parameters:

1. Memorize 500 remote controls (the 501th one will replace the first one)
1. Work voltage: AC/DC 18-250V
2. Work frequency: 433.92MHz
3. Three channels, it can be controlled three motors
4. Light Can be controlled by remote after connect with mini receiver

## Installation

Fixed the receiver on the wall by screws.

## Coding Instruction:

1. Coding with motor: press the switch button of receiver and the NO.1 blue light will be on. Press the button of remote until the L.E.D light of motor flash for 3 times. (Other motors coding are the same)  
Press once of switch button, the NO.1 light of channel 1 will be on. Press twice of the switch button, the NO.2 light of channel 2 will be on.(Channel 3 & Channel 4 are the same as)
2. Light control system: press the switch button four times, the NO.4 blue light will be on. Then press the button of remote until the L.E.D light of motor flash for 3 times.  
(Exit the code mode without any operation for 15 seconds)
3. Clear coding: Press the key button for 8 seconds, the blue light will flash for 3-4 seconds, the light will be off.

## Connecting Instruction:

1. Connect the receiver with 7P connector on motor.
2. Connector NO1&CM1 means Channel 1, NO2&CM2 means Channel 2, NO3&CM1 means Channel 3.
3. Connect NO1 with PB connector, connect CM1 with GND.(Other channels are the same as channel 1)
4. After finished coding you can control motor by remote.

## Receiver for Light:

1. Connect the light socket, lamp and power supply (neutral, live) in series.(Fig 1)  
After coding you can control the motor & light.
